

SAMPLE QUESTION

1. Which option represents a good communication skill?

- A. Speaking with confusion
- B. Speaking clearly**
- C. Speaking fast
- D. Speaking difficult words

Explanation:

Good communication skills involve clarity, confidence, and effectiveness in conveying a message. Speaking clearly ensures that the listener understands the information without confusion.

- Speaking with confusion can lead to misunderstandings.
- Speaking fast may make it difficult for the listener to grasp the message.
- Using difficult words can create a communication barrier.

Thus, "Speaking clearly" is the best representation of good communication skills.

2. She have been studying for her exams all day

Choose the part of the sentence that has a grammatical error.

- A. all studying
- B. day
- C. have**
- D. for

Correct sentence:

"She has been studying for her exams all day."

Explanation:

- The subject "She" is singular, so it should be followed by "has" instead of "have" in the present perfect continuous tense (has been + verb-ing).
- "Have" is used with plural subjects (e.g., "They have been studying"), while "has" is used with singular subjects ("She has been studying").

Thus, the correct answer is "have" because it should be "has" instead.

3. What is a good practice to maintain personal hygiene?

- A. Brush teeth only before meetings.
- B. Wash hands regularly with soap.**
- C. Shower at least once a week.
- D. Share earphones and other products.

Explanation:

Maintaining personal hygiene is essential for good health and preventing infections.

- Brushing teeth only before meetings is not enough; you should brush at least twice a day.
- Showering only once a week is not recommended; daily or frequent showers help maintain cleanliness.
- Sharing earphones and personal products can spread bacteria and infections.

Thus, washing hands regularly with soap is a good practice for maintaining personal hygiene.

4.What type of mind-set is possessed by a person who does not allow new ideas for the sake of progression?

- A. Fear mind-set
- B. Growth mind-set
- C. Fixed mind-set**
- D. Malleable mind-set

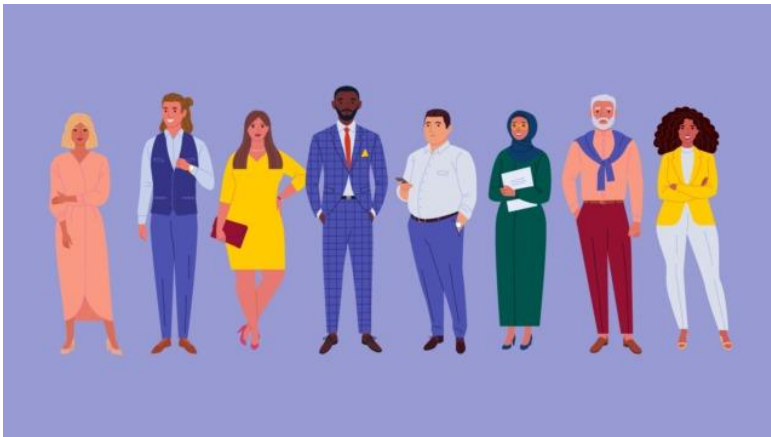

Explanation:

A fixed mindset refers to a belief that abilities, intelligence, and skills are static and cannot be improved. A person with this mindset resists new ideas and avoids challenges, fearing failure or change.

- Fear mind-set is driven by anxiety or hesitation, but not necessarily a resistance to new ideas.
- Growth mind-set embraces learning, challenges, and innovation.
- Malleable mind-set suggests flexibility and adaptability, which is the opposite of a fixed mindset.

Thus, the correct answer is "Fixed mind-set", as it describes someone who resists new ideas and progression.

5.Which option best describes the given image?

- A. Diverse Workforce**
- B. Village people
- C. Sports player
- D. Bus-stop Queue

Explanation:

The image shows a group of professionally dressed individuals from different ethnic backgrounds, genders, and cultures, which represents diversity in a workplace.

Why the other Options are incorrect?

- Village people → The individuals are wearing modern, formal attire, not traditional rural clothing.
- Sports players → There is no sports equipment or athletic wear visible.
- Bus-stop queue → The individuals are standing in a posed manner, not waiting in line at a bus stop.

6.What is shortcut key for copy function in windows?

- A. Ctrl + C**
- B. Ctrl + P
- C. Ctrl + J
- D. Ctrl + K

Explanation:

In Windows, Ctrl + C is the standard shortcut for the copy function.

- Ctrl + P → Used for printing documents.
- Ctrl + J → Opens the Downloads window in most web browsers.
- Ctrl + K → Inserts a hyperlink in some applications.

Thus, the correct answer is "**Ctrl + C**", which is used to copy selected text, files, or objects.

7. Assume that Rahul notices that he has lost his debit card.

What should he do in this case?

- A. **Deactivate his card and inform the police**
- B. File a case against bank
- C. Use another debit card
- D. Inform fire department

Explanation:

If Rahul loses his debit card, he should immediately:

1. Deactivate (block) the card by contacting his bank to prevent unauthorized transactions.
 2. Inform the police if the card is stolen, as it may be misused for fraud.
- Filing a case against the bank is unnecessary unless the bank is at fault.
 - Using another debit card does not solve the issue of the lost card being misused.
 - Informing the fire department is irrelevant, as they handle fire-related emergencies, not financial fraud.

Thus, the best course of action is to "Deactivate his card and inform the police."

8. What is a correct example of a "need" while calculating expenses?

- A. Going to the movies
- B. **Groceries for food**
- C. Travelling cities
- D. Shopping for branded items

Explanation:

A "need" refers to something essential for survival or basic living, while "wants" are non-essential luxuries.

- Groceries for food → Essential for survival, making it a need.
- Going to the movies → Entertainment expense, considered a want.
- Travelling cities → If it's for leisure, it's a want (unless it's for work or emergencies).
- Shopping for branded items → Luxury expense, not necessary for basic survival.

Thus, the correct answer is "Groceries for food", as it is a fundamental need.

9. Which characteristic in the introductory statute of India describes our country's ability to make its own decisions?

- A. Secularism
- B. Republic
- C. Socialism
- D. Sovereign**

Explanation:

The term "Sovereign" in the Preamble of the Indian Constitution means that India is independent and has the authority to make its own decisions without external interference.

- Secularism → Ensures freedom of religion and separation of religion from the state.
- Republic → Means India has an elected head of state (President) rather than a monarch.
- Socialism → Ensures social and economic equality for all citizens.

Thus, "Sovereign" best describes India's ability to make its own decisions.

10. Which step of the entrepreneurship process examines one's own strengths and weaknesses?

- A. Evaluating ideas
- B. Identifying opportunities
- C. Planning
- D. Self-discovery**

Explanation:

The self-discovery phase in entrepreneurship involves analysing personal strengths, weaknesses, interests, and skills to determine whether one is suited for a business venture.

- Evaluating ideas → Involves assessing different business concepts for feasibility.
- Identifying opportunities → Focuses on finding gaps in the market.
- Planning → Involves developing a strategy for execution.

Thus, the correct answer is "Self-discovery", as it focuses on examining one's own strengths and weaknesses before starting a business.

11. In which industrial revolution did electricity and mass production of garments take place?

- A. 2nd Industrial revolution**
- B. 3rd Industrial revolution
- C. 1st Industrial revolution
- D. 4th Industrial revolution

Explanation:

The 2nd Industrial Revolution (late 19th to early 20th century) was marked by electricity, mass production, and advancements in industries like textiles, steel, and chemicals. This revolution enabled factories to produce garments on a large scale using automated machines.

- 1st Industrial Revolution → Focused on steam power and mechanization (18th–19th century).
- 3rd Industrial Revolution → Introduced computers, automation, and digital technology (late 20th century).
- 4th Industrial Revolution → Involves AI, IoT, robotics, and smart technologies (current era).

Thus, the correct answer is "2nd Industrial Revolution", as it brought electricity and mass production.

12. What is a benefit of diversity and inclusion?

- A. It leads to unfair advantages
- B. It leads to a creative workplace**
- C. It leads to a better environment
- D. It makes the workplace crowded

Explanation:

Diversity and inclusion bring different perspectives, experiences, and ideas, leading to more creativity and innovation in the workplace.

- It leads to unfair advantages → False, diversity ensures fairness and equal opportunities.
- It leads to a better environment → Partially true, but creativity is a key benefit.
- It makes the workplace crowded → False, diversity enhances productivity rather than creating overcrowding.

Thus, the correct answer is "It leads to a creative workplace", as diversity fosters innovation and new ideas.

13. The given image is of an employee providing effective customer service. How does providing effective customer service help an organization?

- A. It helps building a good reputation for the brand.**
- B. It has no impact on customer loyalty or brand perception.
- C. It leads to a decline in sales and revenue.
- D. It reduces operational costs.

Explanation:

Providing effective customer service ensures that customers have a positive experience with the company, leading to:

- Brand loyalty – Satisfied customers are more likely to return.
- Positive word-of-mouth – Customers recommend the brand to others.
- Stronger customer relationships – Trust and credibility increase.
- Higher sales and revenue – Happy customers contribute to business growth.

14. Which right of citizens is being exercised in the given image?

- A. Right to own property
- B. Right to vote**
- C. Right to free education
- D. Right to healthcare

Explanation:

The image shows an Electronic Voting Machine (EVM), which is used during elections to allow citizens to cast their votes. Voting is a fundamental right and a key part of a democracy, enabling people to choose their representatives and participate in governance.

Why the other Options are incorrect?

- Right to own property → This refers to owning land or assets, unrelated to voting.
- Right to free education → Education rights ensure access to schooling, not elections.
- Right to healthcare → This ensures medical services but is not related to voting.

Thus, the correct answer is:

Right to vote

15. Identifying challenges in parallel programming for machine learning.

- A. High data dependency**
- B. Homogeneous processing units
- C. Minimal data dependencies
- D. Abundant computational resources.

Explanation:

One of the biggest challenges in parallel programming for Machine Learning is high data dependency. When computations depend on the results of previous operations, it becomes difficult to parallelize tasks efficiently.

16. Determining the step that follows Model Evaluation in a simple Machine Learning algorithm flowchart.

- A. Data Collection
- B. Model Training
- C. Documentation Update**
- D. Algorithm Selection.

Explanation:

After Model Evaluation, the next step in a simple Machine Learning algorithm flowchart is updating the documentation with insights, findings, and necessary adjustments before finalizing or deploying the model.

Why the other Options are incorrect?

- Data Collection → Happens at the beginning of the ML pipeline, not after evaluation.
- Model Training → Comes before evaluation, not after.
- Algorithm Selection → Done before training, not after evaluation.

Thus, the correct answer is:

"Documentation Update", as it ensures proper record-keeping and knowledge sharing after model evaluation.

17. Identifying the next step after "Testing and Optimizing Code" in the process of code development and approval for Machine Learning.

- A. Additional Optimization
- B. Submitting Code for Approval**
- C. Reviewing Previous Code
- D. Writing Code.

Explanation:

In the code development and approval process for Machine Learning (ML), the next step after Testing and Optimizing Code is to submit the code for approval. This step ensures that the code meets quality standards, passes peer review, and is ready for deployment.

Why the other Options are incorrect?

- Additional Optimization → Optimization is important but is typically done before submitting for approval.
- Reviewing Previous Code → Reviewing old code happens earlier in the process, not necessarily after testing and optimizing.
- Writing Code → Code writing happens before testing and optimization, not after.

Thus, the correct answer is:

"Submitting Code for Approval", as it is the logical step before deploying ML models.

18. Evaluating the design of data flows and structures in an autonomous system.

- A. Regression
- B. Clustering**
- C. Data Mining
- D. Classification.

Explanation:

Clustering is a technique used to group similar data points based on patterns or relationships. In an autonomous system, evaluating data flows and structures often involves identifying patterns, segmenting data, and optimizing system behaviour, which aligns with clustering.

19. Type of testing to avoid covering your sign-in function.

- A. Orthogonal Pattern Testing
- B. Matrix Testing
- C. Pattern Testing

D. Regression Testing.

Explanation:

Regression testing is performed to check if new changes in code affect existing functionality. However, if the goal is to avoid testing the sign-in function, regression testing is not suitable because it ensures that previous features (including sign-in) still work correctly.

20. How to determine if an algorithmic model is good enough to train the dataset.

- A. By recording the time taken
- B. By not following proper procedure
- C. By testing its accuracy and speed**
- D. By using it without evaluation

Explanation:

To determine if an algorithmic model is suitable for training a dataset, you need to evaluate its performance metrics, such as:

Accuracy → Measures how well the model predicts correct outcomes.

Speed → Ensures the model processes data efficiently within acceptable time limits.

21. How can you determine if an algorithmic model is good enough to train the dataset?

- A. By recording the time taken.
- B. By not following proper procedure.
- C. By testing its accuracy and speed.**
- D. By using it without evaluation.

Explanation:

To determine if an algorithmic model is suitable for training a dataset, you need to evaluate its performance metrics, such as:

Accuracy → Measures how well the model predicts correct outcomes.

Speed → Ensures the model processes data efficiently within acceptable time limits.

22. A company wants to launch a new feature to determine if a plant is edible using Machine Learning models. They need to choose the most efficient model among numerous Options. What should be done to select the optimum system?

- A. Select the model with the highest training accuracy
- B. Quantify the model's performance using evaluation metrics**
- C. Choose the most complex model available
- D. Randomly pick a model and test it in production

Explanation:

Choosing the best machine learning model requires evaluating its performance using relevant metrics, not just relying on training accuracy. Metrics such as precision, recall, F1-score, and AUC-ROC help assess how well the model performs on real-world data. Simply selecting the most complex model (C) or picking

randomly (**D**) can lead to inefficiencies or poor generalization. The highest training accuracy (**A**) can be misleading due to overfitting.

23. When documenting an algorithm, in which section should you include detailed explanations of the algorithm's principles, its operational logic, and any foundational concepts necessary for understanding how it functions?

- A. Warnings
- B. Performance
- C. Mechanism**
- D. Validation

Explanation:

The Mechanism section of an algorithm's documentation provides detailed explanations of its principles, operational logic, and foundational concepts required to understand how it functions. This section helps readers grasp how the algorithm processes data, makes decisions, and produces outputs.

24. Which factor can be a reason for humans not being able to completely rely and trust algorithms?

- A. Algorithms may be subject to bias.**
- B. Algorithms have complex architectures.
- C. Algorithms are unable to calibrate sensors.
- D. Algorithms make ethical decisions.

Explanation:

One major reason humans cannot fully trust algorithms is that they can inherit biases from the data they are trained on or from the way they are designed. This can lead to unfair or inaccurate decisions, especially in areas like hiring, law enforcement, and finance.

25. You want to add an element into the stack. Arrange the function in chronological order.

1. Create a function name push()
2. Add the element you need to enter in the stack
3. Call the function push()

- A. 1->2->3**
- B. 2->1->3
- C. 3->1->2
- D. 3->2->1

Explanation:

The correct answer is **1 → 2 → 3**, as it follows the logical sequence for adding an element to a stack using a function. First, a function named push() must be created to define the logic for inserting elements into the stack. Next, within this function, the element to be added is specified and inserted into the stack. Finally, the function push() is called to execute the operation and successfully add the element. This sequence ensures that the function is properly defined before it is used.

26. What is an important aspect to consider when evaluating the design of data flows and structures in an autonomous system?

- A. The aesthetic appeal of the system's physical appearance
- B. The brand of hardware components used
- C. The colour scheme of the user interface

D. The efficiency and security of data transfer within the system

Explanation:

When evaluating the design of data flows and structures in an autonomous system, the primary concern is ensuring that data is transferred efficiently and securely. Autonomous systems typically involve complex data processing, real-time decision-making, and communication between various components.

27. Which of the following algorithmic evaluation criteria evaluates how well an algorithm can handle unexpected or extreme conditions?

- A. Accuracy
- B. Robustness**
- C. Scalability
- D. Efficiency

Explanation:

This is the correct answer. Robustness evaluates the algorithm's ability to handle variations, errors, and unexpected or extreme conditions in real-world environments. A robust algorithm can still function correctly even when inputs are noisy or unforeseen.

28. What is the purpose of submitting tested and optimized code for approval?

- A. To bypass security protocols
- B. To speed up the deployment process
- C. To ensure the code is free of bugs and errors**
- D. To gain control over the company's data

Explanation:

Submitting tested and optimized code for approval is essential to ensure quality, reliability, and security before deployment. It helps to:

Identify and fix bugs before release.

Ensure performance optimization and maintainability.

Reduce risks of system failures after deployment.

29. What can be said about the activity of the person wearing a black coat in the given picture?

- A. analysing data on a computer
- B. Providing feedback to the team**
- C. Taking notes during a meeting
- D. Giving PowerPoint presentation

30. Assume that Alice has just completed the development of a new software application. She needs to create documentation for this software that will be used by various stakeholders including her development team, the marketing department, and end-users. What should Alice primarily include in her documentation to effectively cater to the needs of these diverse stakeholders?

- A. Exclusive focus on the graphical design aspects of the software interface
- B. Comprehensive guides on using the software, along with technical details and troubleshooting tips**
- C. Detailed descriptions of the programming language syntax used in the code
- D. Only the marketing strategies related to the software

Explanation:

Since multiple stakeholders (developers, marketing team, and end-users) will use the documentation, it should include:

- ✓ User guides → Instructions on how to use the software (for end-users).
- ✓ Technical details → Information for developers and IT teams.
- ✓ Troubleshooting tips → Helps users resolve common issues.

Why the other Options are incorrect?

- Exclusive focus on graphical design → UI design is important but does not cover all aspects needed by stakeholders.
- Detailed descriptions of programming language syntax → Useful for developers, but not needed for marketing or end-users.
- Only marketing strategies → Marketing is crucial but does not provide functional or technical details about the software.

Thus, the best answer is:

"Comprehensive guides on using the software, along with technical details and troubleshooting tips"

31. Which section of the documentation typically includes a high-level overview of the software's architecture and components?

- A. Version history
- B. System requirements
- C. User guide
- D. Architectural design**

Explanation:

The Architectural Design section provides a high-level overview of the software's architecture, components, modules, and their interactions. This helps developers and stakeholders understand the structure and design principles of the system.

Why the other Options are incorrect?

- Version history → Tracks changes and updates in the software, not its architecture.
- System requirements → Lists the hardware/software requirements for running the software.
- User guide → Explains how end-users interact with the software, not its internal design.

Thus, the correct answer is "Architectural design", as it describes the structure of the software system.

32. Assume that you are working with an ABC application in the system. The computer's graphical user interface stops responding while you try to enter characters from the keyboard. And you decide to report this to a developer. What information should the bug report contain?

- A. Defect Description, Steps, Date Raised, Reference, Severity, Priority**
- B. Defect Description, Report, Date Raised, Reference, Severity, Tester
- C. Defect Description, Report, Date Raised, Reference, Severity, Priority
- D. Defect Description, Steps, Date Raised, Reference, Severity, Tester

Explanation:

A bug report should provide detailed and structured information to help developers identify, reproduce, and fix the issue efficiently. The key components include:

1. Defect Description → A brief summary of the issue (e.g., "GUI freezes when entering characters").
2. Steps → Clear steps to reproduce the bug.
3. Date Raised → The date when the issue was reported.
4. Reference → Any related logs, screenshots, or error messages for context.
5. Severity → How serious the issue is (Critical, High, Medium, Low).
6. Priority → The urgency of fixing the bug (High, Medium, Low).

Why the other Options are incorrect?

- "Report" is redundant; the entire document is already a report.
- "Tester" is useful but not a mandatory field in a bug report; the tracking system usually logs it automatically.

Thus, the correct answer is:

"Defect Description, Steps, Date Raised, Reference, Severity, Priority"

33. In order to create an adaptable work environment, it is crucial for organizations to comply with PwD inclusive policies. What is the benefit of an adaptable work environment?

- A. Lack of flexibility in work arrangements
- B. Inefficient use of resources and time
- C. Limited opportunities for professional growth

D. More inclusive and productive workplace

Explanation:

An adaptable work environment that follows PwD (Persons with Disabilities) inclusive policies ensures equal opportunities, accessibility, and a supportive workplace for all employees. This leads to higher productivity, job satisfaction, and innovation.

- Lack of flexibility in work arrangements → Prevents inclusivity and adaptability.
- Inefficient use of resources and time → The opposite of what an adaptable environment aims to achieve.
- Limited opportunities for professional growth → Inclusivity promotes career advancement and skill development.

Thus, the correct answer is "More inclusive and productive workplace", as it fosters diversity, efficiency, and equal opportunities.

34. Assume that you are managing a manufacturing facility and are tasked with reducing the operational costs and environmental impact. You decide to focus on optimizing the usage of resources. Which action best aligns with optimizing the usage of electricity, materials, and water, and planning the implementation of energy-efficient systems?

- A. Focusing solely on immediate cost reduction by cutting back on essential resource usage
- B. Outsourcing resource management to an external agency without internal changes
- C. Implementing a plan to gradually upgrade to energy-efficient machinery and revise processes to minimize waste**
- D. Maintaining the current practices, assuming they are already optimized

Explanation:

To optimize electricity, materials, and water usage while improving cost efficiency and sustainability, the best approach is to upgrade to energy-efficient systems and refine processes for waste reduction.

- Focusing solely on immediate cost reduction by cutting back on essential resource usage → Can harm productivity and long-term efficiency.
- Outsourcing resource management to an external agency without internal changes → May help, but without internal improvements, inefficiencies persist.
- Maintaining the current practices, assuming they are already optimized → Prevents further innovation and energy savings.

Thus, the correct answer is "Implementing a plan to gradually upgrade to energy-efficient machinery and revise processes to minimize waste", ensuring long-term sustainability and cost savings.

35. How can the workplace become energy efficient and sustainable?

- A. Ignoring energy consumption patterns
- B. Use energy efficient light bulbs**
- C. By constantly using lights
- D. Overloading electrical circuits

Explanation:

An energy-efficient and sustainable workplace reduces unnecessary energy consumption and promotes environmental responsibility.

- Ignoring energy consumption patterns → Leads to wasteful energy use.
- By constantly using lights → Increases electricity consumption unnecessarily.
- Overloading electrical circuits → Unsafe and inefficient, leading to electrical hazards.

Thus, the correct answer is "Use energy-efficient light bulbs", as they consume less power and last longer, reducing overall energy usage.

36. Which characteristic of autonomous system deals with the aspects of resource utilization and workload management, thus optimizes the components to improve its efficiency?

- A. Self-healing
- B. Self-configuring
- C. Self-optimizing**
- D. Self-protecting

Explanation:

A self-optimizing autonomous system continuously monitors and adjusts resource utilization and workload management to enhance efficiency, performance, and cost-effectiveness.

- Self-healing → Detects and fixes faults automatically.
- Self-configuring → Adjusts system settings dynamically based on requirements.
- Self-protecting → Focuses on security and threat prevention.

Thus, the correct answer is "Self optimizing", as it ensures efficient resource utilization and workload management.

37. Consider that you are looking for a job and that you have been requested to evaluate your own interpersonal abilities. Which of the following best describes the trait?

- A. Recognizing musical patterns and tones
- B. Communicating well verbally**
- C. Interested in botany and biology
- D. Analysing strengths and weaknesses

Interpersonal abilities refer to skills that help in interacting and communicating effectively with others. These include verbal communication, teamwork, empathy, and relationship-building.

- Recognizing musical patterns and tones → Related to musical intelligence, not interpersonal skills.
- Interested in botany and biology → Reflects scientific curiosity, not social interaction skills.
- Analysing strengths and weaknesses → More related to intrapersonal (self-awareness) skills, not interpersonal skills.

Thus, the correct answer is "Communicating well verbally", as it is key to strong interpersonal skills.

38. What is a key feature of an adaptable and equitable work environment for Persons with Disabilities (PwD) as illustrated in the image?

- A. Uniform desk and chair setups
- B. Accessibility features like wheelchair ramps and Braille signage**
- C. High-tech computer equipment
- D. Open-plan seating arrangements

39. In the given image where everyone has good eyesight, what is crucial for effective communication?

- A. Visual Aids
- B. Technical jargon
- C. Inclusive Language**
- D. Solo Communication

40. Assume that a company decides to save 25% of its energy consumption by switching off its electrical equipment's when not in use. In this situation, what type of energy consumption does the company achieve?

- A. Active consumption
- B. Industrial consumption
- C. Passive consumption**
- D. Quick consumption

Explanation:

Passive consumption refers to the energy used by electrical devices when they are on standby or not actively in use. By switching off equipment when not needed, the company reduces passive energy waste and improves energy efficiency.

- Active consumption → Energy used when devices are actively running.
- Industrial consumption → Refers to energy usage in manufacturing and production industries.
- Quick consumption → Not a standard term in energy management.

Thus, the correct answer is "Passive consumption", as it involves reducing unnecessary energy use.

41. Which statement is an example of an opinion in English language?

- A. Apples are red in colour.
- B. Apples are a good source of nutrients.
- C. Apples are better than bananas.**
- D. Apples contain vitamin C.

Explanation:

An opinion is a personal belief or preference that can vary from person to person, whereas a fact is something that can be proven true.

- "Apples are red in colour." → Fact, as it can be scientifically verified (though some apples are green or yellow).
- "Apples are a good source of nutrients." → Fact, because apples contain vitamins and fibre.
- "Apples contain vitamin C." → Fact, as it is scientifically proven.

Thus, the correct answer is "Apples are better than bananas.", because it is subjective and depends on personal preference.

42. Which of the given Options is a correct way of maintaining a work-life balance?

- A. Sit in front of your computer desk all day long.
- B. Keep professional tasks on second priority even if they are urgent.
- C. Improve skills by reading books and attending seminars.**
- D. Make time to talk to family in the middle of work.

Explanation:

Maintaining a work-life balance involves personal growth, time management, and self-improvement while ensuring productivity at work.

- Sitting in front of your computer desk all day long → Leads to burnout and poor health.
- Keeping professional tasks on second priority even if they are urgent → Reduces work efficiency and career growth.
- Making time to talk to family in the middle of work → While staying connected with family is important, personal conversations should not disrupt work hours.

Thus, the correct answer is "Improve skills by reading books and attending seminars", as it promotes growth without neglecting responsibilities.

43. Assume that Rajeev is applying for a job on LinkedIn. What should he upload during the application process?

- A. A detailed description of his daily routine
- B. His updated resume**
- C. His banking statement
- D. His sports achievements

Explanation:

When applying for a job on LinkedIn or any other platform, Rajeev should upload his updated resume to showcase his skills, experience, and qualifications relevant to the job.

- A detailed description of his daily routine → Not relevant for job applications.
- His banking statement → Private information that should never be shared.
- His sports achievements → Useful only if applying for a sports-related job.

Thus, the correct answer is "His updated resume", as it is essential for job applications.

44. What is the main technique of including diversity in the workplace?

- A. Communicate to avoid diversity of human resources
- B. Policy to streamline to avoid inclusion
- C. Partnerships to avoid inclusion
- D. Attitude to embrace diversity and inclusion**

Explanation:

The most effective way to include diversity in the workplace is to foster an open and inclusive attitude that welcomes people from different backgrounds, cultures, and perspectives.

- Communicate to avoid diversity of human resources → This goes against the goal of inclusion.
- Policy to streamline to avoid inclusion → Policies should promote inclusion, not avoid it.
- Partnerships to avoid inclusion → The goal should be to encourage diversity, not prevent it.

Thus, the correct answer is "Attitude to embrace diversity and inclusion", as it promotes a positive and welcoming work environment.

45. Which domain do the skills shown in the picture belong to?

- A. Mathematics
- B. Politics
- C. Science

D. Communication

46. Which approach is most effective in managing an unhappy customer?

- Avoid taking responsibility for the issue
- Offer a generic apology without addressing the specific problem
- **Listen carefully and provide solution**
- Delay responding to the customer's concern and hope they lose interest

Explanation:

The best way to handle an unhappy customer is to actively listen to their concerns, acknowledge the issue, and provide a suitable solution. This builds trust and customer satisfaction.

- Avoid taking responsibility for the issue → Leads to frustration and worsens the situation.
- Offer a generic apology without addressing the specific problem → Feels insincere and does not resolve the issue.
- Delay responding and hope they lose interest → Poor customer service that can harm the business's reputation.

Thus, the correct answer is "Listen carefully and provide a solution", as it ensures customer retention and business success.

47. What skill is most important for an entrepreneur?

- A. Repair skills
- B. Hacking skills
- C. Communication skills**
- D. Acrobat skills

Explanation:

An entrepreneur needs strong communication skills to pitch ideas, negotiate deals, build relationships, and lead teams effectively.

- Repair skills → Useful for technicians but not essential for entrepreneurship.
- Hacking skills → Important for cybersecurity but not for general business success.
- Acrobat skills → Relevant for performers, not entrepreneurs.

Thus, the correct answer is "Communication skills", as they are key for networking, leadership, and business growth.

48. What should be done if you want to succeed in your career?

- A. Do not focus on the task assigned
- B. Relax during work time
- C. Prepare a career plan and work hard**
- D. Interfere in colleague's work

Explanation:

To succeed in your career, it is important to have clear goals, a structured career plan, and a strong work ethic.

- Do not focus on the task assigned → Leads to poor performance and missed opportunities.
- Relax during work time → Relaxation is important, but working efficiently during work hours is crucial.
- Interfere in colleague's work → Can create conflicts and hinder teamwork.

Thus, the best option is "Prepare a career plan and work hard", as it ensures growth, learning, and long-term success.

49. Which of the following is the right way to communicate with people with learning disabilities?

Options:

- A) Try to finish their sentences
- B) Avoid using visual aids
- C) Use humour and sarcasm
- D) Use short, clear, and direct sentences**

Explanation:

When communicating with individuals with learning disabilities, using short, clear, and direct sentences helps improve comprehension and reduces confusion. Complex language or long sentences can be overwhelming, making it harder for them to process information. Clear instructions enhance understanding, ensuring they can effectively engage in conversations. Additionally, avoiding jargon, speaking at a moderate pace, and providing supportive gestures or visual aids can further aid communication. This approach fosters inclusivity, respect, and meaningful interactions, enabling individuals with learning disabilities to feel heard and understood in conversations. Effective communication promotes confidence and better participation in various settings.

50. Which of the following platforms is suitable for job searching?

Options:

- A) Snapchat
- B) Instagram
- C) Facebook
- D) LinkedIn**

51. Which of the following English phrases will you use for being respectful of others' time?

Options:

- A) Is this a good time to talk?**
- B) Could you please tell me some more about yourself?
- C) May I place you on hold for a moment?
- D) I am sorry, I did not get that.

Explanation

Being respectful of others' time means acknowledging their availability before engaging in a conversation. The phrase "**Is this a good time to talk?**" demonstrates politeness and consideration, allowing the other person to indicate whether they are free or occupied. It helps avoid interruptions and ensures a more productive and mutually convenient discussion. The other options focus on gathering information, holding a conversation, or seeking clarification, but they do not directly express respect for someone's time. Using this phrase fosters professionalism and courteous communication in both personal and professional interactions.

52. Which of the following is the safe way to use the internet through public Wi-Fi?

Options:

- A) Keep your firewall disabled
- B) Turn on auto-connect
- C) Turn on file sharing
- D) Use a VPN (Virtual Private Network) on your device**

Explanation

Using a VPN is the safest way to browse the internet on public Wi-Fi, as it encrypts your data and protects it from potential cyber threats, such as hackers and data breaches. Public Wi-Fi networks are often unsecured, making personal information vulnerable to unauthorized access. In contrast, keeping the firewall disabled, enabling auto-connect, or turning on file sharing can expose your device to security risks. A VPN ensures privacy by masking your IP address and encrypting your internet traffic, making it a crucial tool for safe browsing.

53. Identify the testing tool shown in the image given below.

The image displays a red and white flame-like logo, which is the logo of _____.

- A) TensorBoard
- B) PyTorch**
- C) Pytest
- D) MLflow

54. Which of the following is the first step in identifying your career goals?

- A) Explore your Options
- B) Assess your current situation**
- C) Set your short-term and long-term goals
- D) Review and adjust your goals

Explanation

The first step in identifying career goals is to evaluate where you currently stand in terms of skills, interests, strengths, and experiences. Understanding your present situation allows you to recognize areas for growth, identify potential career paths, and determine what aligns with your aspirations. Once you have a clear picture of your current position, you can explore available options, set short-term and long-term goals, and make necessary adjustments as you progress. Skipping this initial step may lead to setting unrealistic or misaligned career objectives.

55. Identify the challenge in parallel programming in which some form of data transfer is required to move variable values to a processor's local memory or cache.

Options:

- A) Load balancing
- B) Communication**
- C) Debugging
- D) Concurrency

Explanation

In parallel programming, communication refers to the challenge of transferring data between processors, particularly when a variable's values need to be moved to a processor's local memory or cache. Efficient data communication is crucial to maintaining performance and minimizing latency. Poorly managed communication can lead to bottlenecks, increased execution time, and reduced scalability. Unlike load balancing, debugging, or concurrency, which deal with different aspects of parallel computing, communication specifically addresses the transfer of data between processing units to ensure synchronized execution.

56. What is the importance of employability skills in the IT sector?

- A) To make individuals less attractive to employers
- B) To enhance an individual's ability to secure and maintain employment**
- C) To avoid changing job market demands
- D) To limit job prospects

Explanation

Employability skills are crucial in the IT sector as they go beyond technical expertise and contribute to an individual's overall professional success. These skills, such as problem-solving, communication, teamwork, adaptability, and time management, enable IT professionals to effectively collaborate, meet project deadlines, and adapt to evolving technologies. In a rapidly changing industry, possessing strong employability skills makes individuals more competitive and ensures long-term career growth. The other options are incorrect because employability skills improve job prospects rather than limit them and help professionals stay relevant in a dynamic job market.

57. Which of the following is the right way to work collaboratively with others as a team in the IT sector?

- A) Establish a common goal**
- B) Avoid incorporating technology
- C) Schedule irregular meetings
- D) Limit team-building exercises

Explanation

Working collaboratively in the IT sector requires a shared vision and clear objectives to ensure all team members are aligned and working efficiently. Establishing a common goal fosters teamwork, enhances productivity, and ensures project success. It allows team members to coordinate efforts, distribute tasks effectively, and solve challenges collectively. The other options are incorrect because avoiding technology hinders efficiency, irregular meetings disrupt workflow, and limiting team-building exercises weakens team cohesion. Effective collaboration is built on communication, shared responsibility, and mutual support, making a common goal essential for success.

58. Which of the following is a benefit of optimizing code performance?

Options:

- A) Reduced scalability
- B) Enhanced user experience**
- C) Enhanced resource consumption
- D) Higher bandwidth usage

Explanation

Optimizing code performance ensures that applications run efficiently, reducing load times and improving responsiveness, which directly enhances the user experience. Faster and more reliable software leads to better usability, increased customer satisfaction, and higher retention rates. The other options are incorrect because optimization improves scalability rather than reducing it, decreases resource consumption rather than increasing it, and minimizes bandwidth usage instead of making it higher. Well-optimized code also enhances system performance, reduces costs, and supports seamless integration with various platforms and devices.

59. Identify the technical specification of the autonomous system that has the ability to add new components and remove old or faulty components.

Options:

- A) Self-healing
- B) Self-configuring**
- C) Self-optimizing
- D) Self-protecting

Explanation

A **self-configuring** autonomous system has the capability to dynamically add new components and remove old or faulty ones without human intervention. This ensures adaptability and seamless operation as the system evolves. The other options are incorrect because **self-healing** focuses on detecting and recovering from failures, **self-optimizing** enhances performance by adjusting resources efficiently, and **self-protecting** involves identifying and mitigating security threats. Self-configuring systems are crucial in environments where scalability and flexibility are required, such as cloud computing, IoT networks, and modern IT infrastructures.

60. Which of the following is an example of a data structure that influences the speed of your algorithm's model?"

Options:

- A) Search
- B) Sort
- C) Array**
- D) Cluster

Explanation

An **array** is a fundamental data structure that directly influences the speed and efficiency of an algorithm. The choice of data structure affects how quickly data can be accessed, inserted, deleted, or modified, ultimately impacting the performance of algorithms. Arrays provide **constant-time access ($O(1)$)** to elements using indexing, which makes them highly efficient for tasks that require fast lookups. In contrast, **search and sort** are operations performed on data structures rather than data structures themselves, and **cluster** is a concept related to data organization rather than an algorithm's speed.

61. Which of the following is an example of learning and innovation skills?

- A) Flexibility
- B) Critical thinking**
- C) Media literacy
- D) Adaptability

Explanation

Learning and innovation skills are essential for problem-solving, creativity, and adaptability in the modern workplace. **Critical thinking** involves analysing information, evaluating evidence, and making reasoned decisions, which are key components of learning and innovation. It enables individuals to approach problems logically and develop innovative solutions.

62. Identify the technical specification of the algorithmic model, which refers to the amount of memory used by the algorithm as a function of the size of the input.

- Options:
- A) Accuracy
 - B) Time complexity
 - C) Feasible
 - D) Space complexity**

Explanation

Space complexity refers to the total amount of memory required by an algorithm to run as a function of the input size. It includes both the memory used for variables, data structures, and function calls during execution. Optimizing space complexity is crucial for ensuring efficient memory utilization, especially in large-scale applications.

63. Identify the element of the diversity policy that outlines the purpose and expression of the desired vision.

- Options:
- A) Definition of diversity
 - B) Guiding principles
 - C) Policy statement**
 - D) Strategies and initiatives

Explanation

A **policy statement** is a key element of a diversity policy that outlines the organization's vision, commitment, and purpose regarding diversity and inclusion. It clearly expresses the desired goals and values the organization upholds to create an inclusive environment.

64. Which of the following card is associated with a bank account and allows you to pay in both physical and online stores and to withdraw cash at branches or ATMs?

Options:

- A) Debit card**
- B) Credit card
- C) Virtual card
- D) Balance transfer card

Explanation

A **debit card** is directly linked to a bank account and allows users to make payments at physical and online stores, as well as withdraw cash from ATMs or bank branches. The money is deducted instantly from the account balance.

65. Identify the type of entrepreneurship that merges entrepreneurial talent and skills with the technical process to develop a business.

Options:

- A) Environmental entrepreneurship
- B) Technopreneur ship**
- C) Social entrepreneurship
- D) Intrapreneurship

Explanation

Technopreneur ship is a type of entrepreneurship that combines technical expertise with business innovation. It involves leveraging **technology, innovation, and entrepreneurial skills** to create and develop businesses, often in the fields of software, hardware, artificial intelligence, and other emerging tech sectors.

66. Identify the type of customer who has just joined your customer base for the first time.

- A) Discount customer
- B) Impulse customer
- C) Potential customer
- D) New customer**

Explanation

A **new customer** is someone who has just made their first purchase or interaction with a business. They have recently joined the customer base and may need onboarding, guidance, and engagement to ensure a positive experience and future loyalty.

67. Which of the following is the correct way to implement environmentally sustainable practices at the workplace?

- A) Go paperless**
- B) Enhance building energy usage
- C) Limit green commuting
- D) Avoid green vendors

Explanation

Going paperless is a key environmentally sustainable practice that reduces paper waste, conserves natural resources, and minimizes the carbon footprint of an organization. By using digital documentation, cloud storage, and electronic communication, businesses can contribute to sustainability efforts while improving efficiency and reducing costs.

SOFT SKILLS

1. Which quality is essential for effective leadership in the 21st century?

Options

A. Empathy

B. Arrogance

C. Ignorance

D. Dictatorship

Explanation

Empathy is essential for effective leadership in the 21st century because it allows leaders to understand and connect with the feelings and perspectives of their team members. This understanding helps to build trust, foster collaboration, and create a positive work environment. In contrast, arrogance, ignorance, and dictatorship are qualities that can alienate team members, inhibit open communication, and create a toxic workplace. Effective leadership in the modern era requires the ability to inspire and motivate others, which is best achieved through empathy and emotional intelligence.

2. Which is an example of a financial asset?

Options

A. Rental property

B. Book collection

C. Personal vehicles

D. Stamp collection

Explanation

A financial asset is an asset that derives value because of a contractual claim. This includes stocks, bonds, bank deposits, or rental properties. Rental property is considered a financial asset because it can generate income through rent payments and can appreciate in value over time, resulting in potential financial gains for the owner. Conversely, items such as a book collection, personal vehicles, or a stamp collection are considered personal property or collectible assets. While they may have value, they do not typically generate income or have a direct financial claim, making them not financial assets in a traditional sense.

3. What is essential for conveying ideas effectively?

Options

A. Memorization

B. Constitutional Values

C. Teamwork

D. Communication Skills

Explanation

Communication skills are essential for conveying ideas effectively because they allow individuals to clearly and coherently express their thoughts, feelings, and information to others. Effective communication includes listening, speaking, presenting, and writing in a manner that is easily understood by the audience. Without strong communication skills, even the best ideas can be misunderstood or overlooked. Therefore, communication skills are a fundamental tool for ensuring ideas are conveyed precisely and effectively.

4. Which skill involves the ability to use search engines effectively?

Options

- A. Graphic design
- B. Email management
- C. Internet navigation**
- D. Data entry

Explanation

The correct option is 'Internet navigation' because this skill involves the ability to use search engines effectively. Internet navigation encompasses finding, accessing, and retrieving information online, which directly ties into the use of search engines. Skills like graphic design, email management, and data entry do not primarily focus on the use of search engines, making 'Internet navigation' the appropriate choice.

5.Which employability skill involves managing time efficiently?

Options

- A. Adaptability
- B. Negotiation
- C. Conflict resolution

D. Time management

Explanation

The correct option is 'Time management' because it directly refers to the ability to use one's time effectively or productively, especially at work. Managing time efficiently is a critical skill in employability as it helps individuals prioritize tasks, meet deadlines, and improve overall productivity. The other Options - Adaptability, Negotiation, and Conflict resolution - are important employability skills but do not specifically involve managing time.

6.How can entrepreneurs protect their business ideas?

Options

- A. By sharing them publicly
- B. By hiring consultants

C. Through patents

- D. By avoiding competition

Explanation

The correct option is 'Through patents' because patents provide legal protection for unique inventions and business ideas. By securing a patent, entrepreneurs can prevent others from making, using, or selling their invention without permission for a certain period. This legal mechanism ensures that the creator maintains exclusive rights to their intellectual property, fostering innovation and allowing them to capitalize on their ideas. The other Options, such as sharing ideas publicly, hiring consultants, or avoiding competition, do not offer the same level of formal, enforceable protection as patents do.

7.In order to collect various types of waste, consider that an IT company has installed a number of colourful bins. One bin has cardboard, newspapers, and bottles inside it. Which type of waste applies to the given scenario?

Options

- A. Oily Waste
- B. Hazardous Waste

C. Biomedical Waste

D. Dry Mixed Waste

Explanation

The correct option is 'Dry Mixed Waste' because the items listed in the bin, such as cardboard, newspapers, and bottles, are all categorized as dry waste materials. These items are typically recyclable and do not pose any biological, hazardous, or oily contamination risks. Therefore, they fall under the category of Dry Mixed Waste, which includes materials that are dry in nature and can be recycled or disposed of without special handling.

8.What is an effective way to reduce electricity consumption in an office?

Options

A. Using energy-efficient light bulbs

B. Keeping windows and doors open while the air conditioner is running

C. Printing multiple copies of documents unnecessarily

D. Leaving computers and lights on overnight

Explanation

The correct option is 'Using energy-efficient light bulbs'. This is an effective way to reduce electricity consumption in an office because energy-efficient light bulbs, such as LED bulbs, consume significantly less power than traditional incandescent bulbs while providing the same level of brightness. They also have a longer lifespan, which means they need to be replaced less frequently, further reducing overall energy usage. In contrast, the other Options ('Keeping windows and doors open while the air conditioner is running', 'Printing multiple copies of documents unnecessarily', and 'Leaving computers and lights on overnight') are not effective ways to reduce electricity consumption. These practices actually increase energy waste: keeping windows and doors open while the air conditioner is running let's cool air escape, making the AC work harder; printing multiple copies of documents unnecessarily wastes paper and energy; and leaving computers and lights on overnight consumes electricity when it's not needed.

9.Arrange the listed steps in the correct chronological order to effectively utilize the organization's diversity policy in internal and external communications: a. Communicate the importance of diversity and inclusion to all team members. Assess and understand the current diversity policy of the organization. Implement changes to internal and external communication strategies to reflect diversity. Gather feedback from colleagues on the effectiveness of the new communication strategies

Options

A. a>b>c>d

B. d>a>c>b

C. c>a>b>d

D. b>a>c>d

Explanation

The correct chronological order for effectively utilizing the organization's diversity policy in internal and external communications is 'b>a>c>d'. Here is the detailed justification for why this order is appropriate: 1. Assess and understand the current diversity policy of the organization (b): Before any actions can be taken, it is crucial to thoroughly understand the existing diversity policy. This assessment provides a foundational understanding of the organization's commitments and guidelines regarding diversity and inclusion, ensuring that subsequent steps are informed and aligned with the policy's objectives. 2. Communicate the importance of diversity and inclusion to all team members (a): Once the diversity policy is understood, it is essential to communicate its importance to the team. This step helps to build awareness and buy-in from all members, creating a supportive environment for integrating diversity into communication strategies. 3. Implement

changes to internal and external communication strategies to reflect diversity (c): With the team's understanding and support, changes can then be made to communication strategies. These adjustments ensure that both internal and external communications reflect the organization's commitment to diversity and inclusion. 4. Gather feedback from colleagues on the effectiveness of the new communication strategies (d): The final step involves collecting feedback to evaluate the effectiveness of the new strategies. This feedback is valuable for making any necessary adjustments and ensuring the ongoing success of the diversity policy in communications. Therefore, the order 'b>a>c>d' logically follows the sequence of understanding, communication, implementation, and feedback.

10.What is an essential aspect of effective communication in a workplace that includes Persons with Disabilities (PWD)?

Options

A. Employing appropriate communication methods tailored to their needs

- B. Limiting communication with PWD employees
- C. Avoiding direct interaction with PWD employees
- D. Using technical jargon that may be difficult to understand

Explanation

The correct option is 'Employing appropriate communication methods tailored to their needs'. This is the right answer because effective communication in a workplace that includes Persons with Disabilities (PWD) requires an understanding and accommodation of their specific needs. Tailoring communication methods ensures that PWD employees can fully participate, understand, and contribute to workplace interactions. This can include using sign language interpreters, providing written materials in accessible formats, or using assistive technology for communication. On the contrary, limiting communication, avoiding direct interaction, or using confusing technical jargon alienates PWD employees and hampers their ability to contribute effectively, which is contrary to promoting an inclusive workplace.

11.What trait is highly valued in modern professional environments?

Options

A. Inactivity

B. Flexibility

- C. Stubbornness
- D. Rigidity

Explanation

Flexibility is highly valued in modern professional environments because it allows individuals and organizations to quickly adapt to changing circumstances, technologies, and market demands. Being flexible enables employees to take on various roles, collaborate effectively with different teams, and embrace new challenges. This adaptability is crucial for innovation, problem-solving, and maintaining a competitive edge in today's fast-paced world. In contrast, traits such as inactivity, stubbornness, and rigidity can hinder progress and the ability to respond to dynamic work conditions.

12.How should you respond when dealing with an extremely angry customer?

Options

A. Try to calm the customer

- B. Disconnect the call
- C. Argue with the customer
- D. Get angry at the customer

Explanation

When dealing with an extremely angry customer, the best approach is to try to calm the customer. This is because calming the customer helps to de-escalate the situation, allows for effective communication, and provides an opportunity to address the customer's concerns. Disconnecting the call, arguing, or getting angry at the customer are all counterproductive responses that can exacerbate the situation and damage the customer relationship. By calming the customer, you demonstrate professionalism, empathy, and a commitment to resolving their issue, which can lead to a more positive outcome for both the customer and the business.

13. Identify the platform shown below that can be used to explore career opportunities

Options

A. Glassdoor

B. MS Word

C. Paint

D. Figma

Explanation

Glassdoor is a platform that provides insights into companies, job listings, salaries, and employee experiences, making it a valuable resource for exploring career opportunities. On the other hand, MS Word is a word processing application, Paint is a simple graphics editor, and Figma is primarily used for interface design and prototyping. Hence, out of the given Options, Glassdoor is the correct platform for exploring career opportunities.

14. Which approach will be most effective in improving inclusivity for PWD in the workplace?

Options

A. Focusing only on remote work opportunities

B. Redesigning the office layout for better accessibility

C. Limiting job postings to specific candidates

D. Increasing the budget without specific inclusivity measures

Explanation

Redesigning the office layout for better accessibility is the most effective approach to improving inclusivity for people with disabilities (PWD) in the workplace. Providing an accessible and accommodating environment is crucial to ensure that PWDs can perform their job functions effectively and comfortably. It addresses physical barriers that might prevent PWDs from fully participating in the workplace. While remote work opportunities, specific candidate job postings, and increasing budgets are valuable initiatives, they do not directly tackle the physical accessibility issues that many PWDs face in traditional office settings. An inclusive office layout can lead to a more welcoming culture and demonstrate a commitment to supporting and valuing PWDs in the workplace.

15. What does the POSH Act aim to prevent in the workplace?

Options

A. Employee salary deductions

B. Workplace discrimination

C. Sexual harassment

D. Employee transfers

Explanation

The POSH Act, or the Prevention of Sexual Harassment Act, was enacted in India to specifically address and prevent sexual harassment of women in the workplace. It mandates the formation of an Internal

Complaints Committee (ICC) at all workplaces with employees above a certain number, outlines detailed grievance redressal mechanisms, and ensures awareness and training on the issue of sexual harassment. The purpose of the POSH Act is to create a safer work environment for women by preventing and addressing incidents of sexual harassment, making the correct option for what the POSH Act aims to prevent in the workplace 'Sexual harassment'.

16.What should an employee do if they experience sexual harassment at work?

Options

A. Ignore it and continue working

B. Report it to the Internal Complaints Committee (ICC)

C. Quit the job immediately

D. Confront the accused aggressively

Explanation

The correct option is 'Report it to the Internal Complaints Committee (ICC)' because employees have a right to a safe and respectful workplace. Internal Complaints Committees (ICC) are established in organizations as a part of compliance with laws and policies on preventing sexual harassment at the workplace. Reporting the incident to the ICC ensures that the complaint will be handled according to established procedures designed to protect the rights of the victim and ensure that appropriate actions are taken against the accused. This process also helps in maintaining a professional and respectful work environment. Ignoring the incident, quitting the job, or confronting the accused aggressively are not appropriate actions as they do not address the issue adequately or legally, and can potentially lead to further harm or disputes.

17.What is considered inappropriate behaviour under the POSH Act?

Options

A. Professional feedback from a manager

B. Unwanted physical contact or sexual remarks

C. Asking for help with work

D. Inviting a colleague to a team lunch

Explanation

The correct answer is 'Unwanted physical contact or sexual remarks' because the POSH Act (Prevention of Sexual Harassment) is designed to address and prevent sexual harassment in the workplace. Such harassment includes unwanted physical contact, sexual advances, requests for sexual favours, and other verbal or physical conduct of a sexual nature. This type of behavior creates a hostile work environment and is explicitly condemned under the POSH Act. In contrast, the other Options—professional feedback from a manager, asking for help with work, and inviting a colleague to a team lunch—are considered normal professional interactions and are not covered under the inappropriate behaviours specified by the POSH Act.

18.How can organizations promote a safe workplace under the POSH Act?

Options

A. Conduct regular awareness sessions

B. Encourage silence about harassment cases

C. Only take action when incidents go viral

D. Restrict employees from reporting cases

Explanation

The correct option is 'Conduct regular awareness sessions' because under the POSH (Prevention of Sexual Harassment) Act, organizations are mandated to create a safe and respectful working environment. One of

the key measures to achieve this is by conducting regular awareness sessions to educate employees about what constitutes sexual harassment, the procedures for reporting incidents, and the consequences of such behaviour. This proactive approach helps to foster a culture of respect and awareness, ensuring that employees understand their rights and responsibilities, and know how to seek help if needed. The other Options provided ('Encourage silence about harassment cases', 'Only take action when incidents go viral', 'Restrict employees from reporting cases') are inappropriate and contrary to the objectives of the POSH Act, as they would contribute to a culture of fear and silence, and fail to prevent or address harassment effectively.

19. Who is responsible for ensuring compliance with the POSH Act in a company?

Options

A. Only female employees

B. The Internal Complaints Committee (ICC)

C. The sales department

D. Only senior management

Explanation

The Internal Complaints Committee (ICC) is responsible for ensuring compliance with the POSH Act (The Sexual Harassment of Women at Workplace (Prevention, Prohibition, and Redressal) Act, 2013). The POSH Act mandates the formation of an ICC within an organization to address complaints of sexual harassment and to implement preventive measures to ensure a safe working environment. The ICC is required to have a diverse composition, including a senior woman employee as the presiding officer, and is tasked with handling complaints, conducting inquiries, and recommending actions. Therefore, the responsibility of ensuring compliance with the POSH Act lies primarily with the ICC, making 'The Internal Complaints Committee (ICC)' the correct answer.

20. What is an inclusive workplace?

Options

A. One that hires only physically strong employees

B. One that welcomes and supports people with disabilities

C. One that prioritizes senior employees over new hires

D. One that does not accommodate any special needs

Explanation

An inclusive workplace is one that recognizes the diverse needs and contributions of all employees, including those with disabilities. It actively creates an environment where everyone feels welcome, supported, and valued. By welcoming and supporting people with disabilities, a workplace demonstrates a commitment to diversity, equality, and the unique strengths that each individual brings to the team. This not only promotes a positive culture but also complies with regulations that protect the rights of people with disabilities. Therefore, 'One that welcomes and supports people with disabilities' is the correct option.

21. What is the best way to assist a visually impaired colleague at work?

Options

A. Avoid offering help unless asked

B. Provide accessible documents with screen-reader support

C. Assume they cannot perform technical tasks

D. Speak louder than usual

Explanation

The best way to assist a visually impaired colleague at work is to provide accessible documents with screen-reader support. This approach promotes inclusivity by ensuring that visually impaired individuals can access and understand information independently, without needing to rely on others for assistance. It respects their autonomy and provides them with the necessary tools to perform their tasks effectively. Screen readers are specifically designed to aid visually impaired users by converting text to speech or Braille, making digital content accessible. Offering accessible documents by default fosters an equitable working environment and demonstrates a proactive effort to accommodate the diverse needs of all employees. The other Options are less appropriate because they either assume a lack of capability ('Assume they cannot perform technical tasks'), are not considerate of the actual needs of visually impaired individuals ('Avoid offering help unless asked', 'Speak louder than usual'), or might be seen as patronizing or not addressing the core issue of accessibility.

22.How can a company create a more accessible workplace for employees with disabilities?

Options

A. By offering equal opportunities and accommodations

- B. By giving them fewer responsibilities
- C. By keeping them in separate teams
- D. By not hiring differently-abled employees

Explanation

The correct option, 'By offering equal opportunities and accommodations,' is the right answer because it promotes inclusion and ensures that employees with disabilities have the same chances for success as their non-disabled counterparts. Equal opportunities and reasonable accommodations are critical components of an inclusive workplace, as they help everyone perform to the best of their abilities. This approach is aligned with legal frameworks such as the Americans with Disabilities Act (ADA), which mandates accommodations to create a level playing field. The other Options, such as giving them fewer responsibilities, keeping them in separate teams, or not hiring differently-abled employees, are discriminatory practices that segregate and limit the potential of employees with disabilities. These practices undermine the principles of equality and diversity that are fundamental to a fair workplace.

23.What is the most respectful way to interact with a colleague who has a disability?

Options

- A. Treat them differently from other employees
- B. Assume they need help with every task

C. Speak directly to them and ask about their needs

- D. Avoid talking to them about their role

Explanation

The most respectful way to interact with a colleague who has a disability is to speak directly to them and ask about their needs. This approach acknowledges their autonomy and respects their ability to communicate their own requirements. Treating them differently from other employees or assuming they need help with every task can be patronizing and disempowering. Avoiding talking to them about their role can lead to isolation and further marginalization. By engaging in direct and open communication, you foster an inclusive and supportive work environment where the colleague's dignity and preferences are upheld.

24.Why is it important to provide ramps and elevators in office buildings?

Options

- A. To improve office aesthetics

B. To support employees with mobility challenges

- C. To reduce construction costs

D. To restrict access to only certain employees

Explanation

Providing ramps and elevators in office buildings is crucial for supporting employees with mobility challenges. These features ensure that individuals who use wheelchairs, crutches, or have other disabilities can access different floors and areas of the office without difficulty. This contributes to an inclusive and equitable work environment, allowing all employees to participate fully in their workplace. It also complies with legal requirements for accessibility in many jurisdictions. Therefore, the correct option 'To support employees with mobility challenges' accurately identifies the primary reason for these installations.

25. Which of the following is NOT a best practice for workplace inclusion?

Options

- A. Providing equal opportunities to all employees
- B. Ensuring accessibility in physical and digital spaces

C. Favouring one gender over another

- D. Encouraging cultural diversity

Explanation

The correct option is 'Favouring one gender over another' because workplace inclusion aims to create an environment where all employees are treated fairly and have equal opportunities, regardless of their gender. Providing equal opportunities, ensuring accessibility, and encouraging cultural diversity are all key components of an inclusive workplace. However, favouring one gender over another goes against the principles of equality and fairness, and therefore, is not a best practice for workplace inclusion.

26. What is a key benefit of having a diverse workforce?

Options

A. Increased innovation and productivity

- B. More workplace conflicts
- C. Fewer opportunities for learning
- D. Limited perspectives on problem-solving

Explanation

A key benefit of having a diverse workforce is increased innovation and productivity. This is because diversity brings together individuals with different backgrounds, experiences, and perspectives, which can enhance creativity and problem-solving. When people with varied viewpoints collaborate, they are more likely to come up with innovative solutions and improvements. Additionally, a diverse workforce can better understand and cater to a broad customer base, ultimately leading to higher productivity and success for the organization. In contrast, the other Options ('More workplace conflicts', 'Fewer opportunities for learning', and 'Limited perspectives on problem-solving') highlight potential drawbacks or incorrect assumptions about diversity rather than its tangible benefits.

27. How can employees contribute to a more inclusive workplace?

Options

A. By encouraging collaboration and respect

- B. By only working with people similar to them
- C. By avoiding discussions on diversity
- D. By ignoring company inclusion policies

Explanation

The correct option, 'By encouraging collaboration and respect,' is the right answer because fostering an inclusive workplace requires active efforts to create an environment where everyone feels valued and respected. By encouraging collaboration, employees help bridge diverse perspectives and skills, leading to more creative and effective problem-solving. Respect ensures that all employees, regardless of their background, feel safe and valued, which contributes to higher morale, better teamwork, and overall productivity. The other Options are incorrect because avoiding diversity discussions, ignoring inclusion policies, and only working with similar individuals undermine inclusivity and hinder the growth and well-being of the workplace.

28.What is unconscious bias?

Options

A. Intentional discrimination against someone

B. An automatic judgment based on stereotypes

C. A fair hiring practice

D. A method to increase diversity

Explanation

Unconscious bias, often referred to as implicit bias, refers to the automatic judgments and decisions we make based on ingrained stereotypes and prejudices. These biases arise without conscious awareness, control, or intention, and they can influence behaviour and decision-making in ways that may not align with one's explicit beliefs or values. Unlike intentional discrimination, unconscious bias operates on a subconscious level, affecting perceptions and actions subtly and often unconsciously. Therefore, the correct option is 'An automatic judgment based on stereotypes', as it accurately captures the essence of unconscious bias.

29.How can companies reduce unconscious bias in hiring?

Options

A. By using structured interviews and diverse hiring panels

B. By only hiring from specific backgrounds

C. By avoiding new talent recruitment

D. By making hiring decisions based on personal preferences

Explanation

The correct option is 'By using structured interviews and diverse hiring panels'. This is because structured interviews reduce the influence of unconscious biases by ensuring that all candidates are evaluated based on the same criteria and questions. Diverse hiring panels bring multiple perspectives, which can help counterbalance individual biases and lead to more fair and objective decision-making. These practices promote a more inclusive and equitable hiring process. The other Options mentioned either reinforce biases or do not address the issue effectively.

30. What is the best way to handle conflicts in the workplace?

Options

A. Engage in open and respectful communication

B. Avoid addressing the conflict

C. Blame the other person immediately

D. Ignore the situation completely

Explanation

Engaging in open and respectful communication is the best way to handle conflicts in the workplace because it allows for both parties to express their perspectives, understand each other's points of view, and work collaboratively towards a resolution. Open communication fosters a positive work environment, builds trust, and helps prevent misunderstandings from escalating into larger issues. In contrast, avoiding the conflict, blaming others, or ignoring the situation completely can lead to unresolved issues, increased tension, and a toxic work environment. Therefore, addressing conflicts respectfully and openly is essential for maintaining a healthy and productive workplace.
